

Set Up CTIFiber Email on iPhone (iOS 26)

Step 1: Open Mail Settings

1. Open the **Settings** app.
2. Tap **Apps > Mail**.
3. Tap **Mail Accounts**.
4. Tap **Add Account**.
5. Type your email address (ex. email@ctifiber.com).
6. Tap **Add Other Account** (for custom email providers like CTIFiber).
7. Tap **Mail Account** on the **Choose your provider** screen.

Step 2: Enter Basic Info

Fill in the following:

- **Name:** Your name (as it will appear in sent emails)
- **Email:** email@ctifiber.com
- **Password:** Your email password
- **Description:** e.g., “CTIFiber Email”

Tap **Next**.

Step 3: Manual Configuration

If Mail doesn't automatically detect your settings, you'll be prompted to enter them manually.

Choose **IMAP** (recommended for syncing across devices).

☒ **Incoming Mail Server (IMAP)**

- **Host Name:** mail.ctitech.com
 - **Username:** email@ctifiber.com
 - **Password:** Your email password
 - **Port:** 993
 - **Use SSL:** ☒ Yes
-

☒ **Outgoing Mail Server (SMTP)**

- **Host Name:** mail.ctitech.com
 - **Username:** email@ctifiber.com
 - **Password:** Your email password
 - **Port:** 587
 - **Use SSL:** ☒ Yes
 - **Authentication:** Password
-

Step 4: Finalize Setup

1. Tap **Next**.
 2. If the settings are correct, tap **Save**.
 3. Your email account is now added and ready to use in the Mail app.
-
